

**2018-19 VIRGINIA BEEF CATTLE IMPROVEMENT ASSOCIATION  
CENTRAL BULL TEST STATION SUMMARY**

Prepared by: Scott P. Greiner, Extension Animal Scientist, Beef  
Virginia Tech, Blacksburg, Virginia

Central bull testing programs for the performance evaluation and marketing of Virginia Beef Cattle Improvement Association member's bulls were carried out at two test stations located at Culpeper and in Southwest Virginia during the test season 2018-19. One test group was developed at the Culpeper location and two test groups were developed at the Southwest location, and a total of two sales held.

**I. CULPEPER**

This was the 61<sup>st</sup> consecutive year of evaluating bulls at the Culpeper station. Virginia BCIA contracted with Glenmary Farm at Rapidan, Virginia to furnish development facilities, and provide complete care and management for a Senior group of bulls. The Culpeper Senior Bull sale was held at the Culpeper Agricultural Enterprises at Culpeper, Virginia. Virginia BCIA handled consignments, set rules, regulations and performance standards and certified records, and generally supervised the tests and sales, utilizing a committee composed of interested consignors with John Prekker serving as Chair.

**(1) THE BULLS AND THE MANAGEMENT**

Twenty one Virginia BCIA members including: 16 Virginia, 1 Maryland, 2 North Carolina and 2 West Virginia breeders tested bulls. Eighty nine total Senior bulls (calved Aug. 15 to Nov. 30, 2017) were delivered to Glenmary Farms June 26, went on 112 day test July 10 and came off test October 30, 2018. Bulls accepted for test were required to have a WDA of 2.5 pounds at delivery (with allowable shrink), and have a minimum YW EPD based on breed (Virginia Quality Assured Feeder Calf Program genetic standards). Bulls met interstate health shipment requirements at delivery, and in addition had a negative anaplasmosis test, negative PI BVD test, and were required to be inoculated for Clostridial diseases, IBR, PI3, BVD, BRSV, and Haemophilus Somnus before delivery. Upon arrival at the test station bulls received a MLV intranasal IBR/PI3 vaccination, and were boosted for 7-strain clostridial and treated for internal and external parasites with an endectocide product. At the beginning of the official test (14 days after arrival) all bulls received a booster of MLV 5-way viral product (IBR, BVD Types I and II, PI3, BRSV). To be sale eligible bulls had to have a minimum frame score of 5.0, meet minimum YW EPD requirements as specified by the Virginia Quality Assured Feeder Calf Program, pass a breeding soundness exam (including semen evaluation as per Society for Theriogenology). Additionally, a committee evaluated all bulls for structural soundness and bulls found to be unacceptable structurally were not sold. A Sale Index comprised of 2/3 station index (station index = 2/3 yearling weight ratio + 1/3 test ADG ratio) and 1/3 average EPD percentile (20% CE EPD, 20% WW EPD, 20% YW EPD, 20% MM EPD, 10% MB EPD, 10% REA EPD) was used to eliminate additional bulls to arrive at the number eligible for the sale. Additionally, bulls were required to be free of the genetic defects recognized by their respective breed associations (bulls DNA-genotyped as necessary as part of the test). Coat color genotype was performed on Gelbvieh, Simmental and Simmental Hybrid bulls as needed. Approximately 70% of the bulls in each group were cataloged for the sale. A portion of the bulls not qualifying for the sale were sold for slaughter at the conclusion of each test. One breeder consigned a total of five custom test bulls.

**(2) RATIONS**

Rations were formulated in cooperation with Virginia Tech Extension Animal Scientists. The feed was furnished by Glenmary Farm (raised or purchased). Feed ingredients were charged at cost, plus a mark-up per ton of finished feed. Rations were formulated to contain 74% TDN and 14% crude protein (dry basis). Bulls were fed daily in fence-line feed bunks.

The following ingredients comprised the majority of the Senior ration: corn silage, high moisture corn, and distillers grain. Ingredients were included based on availability and price. Chlortetracycline was fed during the warm-up period. A complete mineral containing an ionophore was included in the total mixed rations.

(3) **PERFORMANCE EVALUATION**

Bulls were weighed at 56 days and each successive 28 days. Ultrasound evaluation for fat thickness, ribeye area and percent intramuscular fat was conducted near the end of test. All ultrasound data was processed through a centralized ultrasound processing laboratory and submitted to respective breed associations. At the end of the test bulls were weighed, measured for hip height, evaluated for structural soundness, and had a complete breeding soundness exam, including a semen evaluation. At the end of the test, 42 Senior bulls were removed from the sale group based on failure to meet one or more minimum performance standards, soundness criteria, or were retained for home use. The remaining 66 bulls were cataloged.

(4) **SALE RESULTS**

The Senior sale was held December 8, 2018 at Culpeper Ag Enterprises. The Senior sale was conducted in a traditional format and managed by Virginia BCIA.

All pertinent information was published in the sale catalog, including: BW/ratio, WW/ratio, test YW/ratio, test ADG/ratio, off-test weight, frame score, scrotal circumference, adjusted carcass ultrasound measurements/ratios, CED EPD, BW EPD, WW EPD, YW EPD, DOC EPD, MCE EPD, MM EPD, Carcass/Ultrasound EPDs for fat thickness, REA, and MB; bioeconomic index EPDs (available for each breed), EPD percentiles (for BW, WW, MM, YW), birth date, two-generation pedigree, sire EPDs/accuracies, dam EPDs, dam WW record, horned/poled/scurred status, coat color genotype, and registration/consignor information. Genomically-enhanced EPDs were included on all bulls cataloged (required).

Prior to the sale, sale bulls were videoed individually and the video made available on the BCIA website in conjunction with an electronic copy of the catalog. CowBuyer.com was utilized to offer online bidding option to buyers.

A minimum floor price of \$2000 was established for the Senior sale, and 51 bulls sold at or above the floor price. There was 1 bull which failed to bring the floor price (1 Simmental). A total of 5 Senior Angus bull sold out of state: 3 WI, 2 WV.

**SALE RESULTS – CULPEPER 2018**

**SENIOR BULLS**

<u>NUMBER</u>	<u>BREED</u>	<u>GROSS</u>	<u>AVERAGE</u>
41	Angus	\$130,700	\$3,188
2	Gelbvieh Balancer	\$6,100	\$3,050
8	SimAngus	\$24,400	\$3,050
<b>51</b>		<b>\$161,200</b>	<b>\$3,161</b>

(5) **PROGRAM COSTS**

Consignors paid Glenmary Farm \$200 per bull at delivery as feed cost deposit. All other expenses for testing and sales were deducted or billed for after the sale. Of the \$45.00 per head consignment fee, \$10 went to a BCIA self-insurance fund for indemnity on bulls which die while on test and pays the consignor the value of the bull as a feeder calf at delivery, and \$3 went for mortality insurance coverage against fire, lightning, wind, etc. The remaining \$32.00 went to BCIA for program management. Test costs included feed costs, yardage charged at \$0.50 per head per day, actual medical cost charged on an individual bull basis, and ultrasound fees at cost. Sale cost was charged

on bulls selling as a percentage of sale price. Post test costs were charged on a per head per day basis to cover feed and yardage after the completion of the test. Sale preparation charges included labor fee, plus charges for hauling and freeze branding. Sale costs (advertising, catalog, ring help, online bidding, etc.) were charged at cost as a percentage of the gross. Discounts of \$50 per bull were available to buyers purchasing three or more bulls, and this was included as a sale cost. Virginia BCIA received 3.0% of the sale gross for sale management services. Culpeper Agricultural Enterprises, Inc. was paid a flat fee for use of their facility and this was considered a sale cost.

## II. **SOUTHWEST**

Virginia BCIA contracted with Brian and Kayla Umberger, Mountain Spring Farm at Wytheville, Virginia to furnish development facilities and provide complete care and management for a Senior and Junior group of bulls for the Southwest Bull Test Station. This was the 40<sup>th</sup> year of operation for the Southwest station, and the third year the bulls had been fed at Mountain Spring Farm. The sale was held at the Bottomley sale facility located at Wytheville. Virginia BCIA handled consignments, set rules, regulations and performance standards and certified records, and generally supervised the tests and sales, utilizing a committee composed of interested consignors with Mark DeHaven as Chair.

### (1) **THE BULLS AND THE MANAGEMENT**

Forty eight Virginia BCIA members, including breeders from Virginia (31), North Carolina (4), Tennessee (10) West Virginia (2) and Maryland (1) tested bulls in the Senior and Junior tests. Eighty nine bulls for the Senior test (calved September 1 to December 31, 2017), were delivered on October 1 went on test October 23, 2018 and came off test on February 11 & 12, 2019. One hundred forty one Junior bulls (calved January 1 to March 31, 2018) were also delivered on October 1 went on test October 23, 2018 and came off test on February 11 & 12, 2019. Senior and Junior bulls were sold together on March 23, 2019. Minimum entry and sale requirements as well as the health program were identical to Culpeper. Breeding soundness exams for Senior bulls included semen evaluation (Junior bulls exam only). Additionally, bulls were required to be free of genetic defects recognized by their respective breed associations (bulls DNA-genotyped as necessary as part of the test). Coat color genotyping was performed on Gelbvieh and Simmental bulls as needed. Approximately the top 70% of the bulls in each test group were sold.

### (2) **RATIONS**

A corn silage based ration supplemented with custom-formulated commodity pellet, dry corn, and alfalfa haylage. The ration contained 74% TDN and 13% crude protein (dry basis). An ionophore was included in the ration. Feed was charged at delivered cost, plus a mark-up per ton of finished feed.

### (3) **PERFORMANCE**

Bulls were weighed at 56 days and each 28 days thereafter. Procedures for handling performance were the same as for Culpeper. At the end of the test, 27 Seniors and 48 Juniors were removed from the sale group and were eliminated on failure to meet one or more minimum performance standards, soundness criteria, or were retained for home use.

**(4) SALE RESULTS**

One sale including both Senior and Junior bulls was held March 23, 2019 at the Umberger sale facility outside Wytheville. The sale was managed by Virginia BCIA. Catalog content was the same as for Culpeper Senior. A minimum floor price of \$2000 was established by the test and sale committee for all bulls in the sale. There were 15 bulls which failed to bring the floor price (2 Senior Angus, 1 Senior Gelbvieh, 12 Junior Angus).

Prior to the sale, sale bulls were videoed individually and the video made available on the BCIA website in conjunction with an electronic copy of the catalog. CowBuyer.com was utilized to offer online bidding option to buyers.

Twenty one Senior (9 Angus, 1 Charolais, 1 Gelbvieh, 1 Gelbvieh Balancer, 1 Hereford, 8 Simmental Hybrid) and 17 Junior bulls (6 Angus, 1 Charolais, 1 Hereford, 4 Simmental, 5 Simmental Hybrid) were sold out-of-state: Senior: 15 NC, 1 SC, 5 WV; Juniors: 6 NC, 2 SC, 4 TN, 5 WV.

The sale also included the tenth annual BCIA-Influenced Bred Heifer Sale which included 26 fall-calving Virginia Premium Assured bred heifers from four BCIA members. The heifers sold immediately following the bulls, and averaged \$1,675 per head. Sale expenses were shared with the bulls.

< Minimum Scrotal Circumference	6	2	3	11
Testicular abnormality/injury	0	0	1	1
Penile warts	2	1	0	3
Seminal vesiculitis	0	0	0	0
Epididymitis	0	0	0	0
Other	1	0	6	7 (2.1%)
Retained by Breeder	2	0	1	3 (0.9%)
Low Sale Index <sup>b</sup>	25	13	25	63 (18.8%)

<sup>a</sup>Bulls may be eliminated from sale for failing to meet one or more criteria.

<sup>b</sup>Sale Index = 2/3 Station Index (2/3 YW ratio + 1/3 ADG ratio) + 1/3 EPD average percentile ranking. Sale index used to eliminate additional bulls (after eliminating those that fail to meet other minimum criteria) to arrive at target sale number within each breed.
